得獎簡評：

許育進博士是經濟學門在最近幾年最優秀的年輕學者之一。許博士獲得博士學位至今不到五年，已刊登了12篇論文，其中泰半為經濟及管理學門的頂尖期刊，顯見其學術著作產量高且品質精。

許博士的研究領域是計量經濟理論，尤其是所謂的「處理效應」(Treatment Effect)的理論。這個理論的目的主要是設計統計方法，來檢測計畫執行的效果(Program Evaluation)或政策的成效分析(Policy Analysis)。這已經成為計量經濟學及整個社會科學的重要研究領域。主要是因為世界各國在教育、醫療及福利的支出不斷增加，亟需使用建立在嚴格統計推論的方法，來評估各種政策及制度的成效。

所有審查人都共同認定許博士已經是這領域有影響力的國際性學者，並推斷其將持續產出高品質的研究成果。許博士獲得本屆中央研究院年輕學者研究著作獎，實至名歸。

◆ 會議預告

The Fifth Congress of the East Asian Association of Environmental and Resource Economics (EAAERE)

August 5-7, 2015

Academia Sinica, Taipei, Taiwan

“Green Economy and Sustainable Development”

The Main Theme

The main theme of the Fifth Congress of the EAAERE is “Green Economy and Sustainable Development.” Although the idea of sustainable development has been implemented in many areas since 1985, the progress has not been satisfactory. We may need to formulate another plan of action to guide future progress. At the Conference on Sustainable Development held by the United Nations in Rio, 2012, the attendants agreed that implementing a green economy was the pathway to sustainable development and poverty eradication. However, many unanswered questions still must be tackled before we can successfully transit from the current brown economy to a green one. These questions include: what economic instruments could internalize intergenerational externalities, what policies could avoid and/or improve intergenerational inequalities, what macroeconomic policies could promote a green economy, what types of policy instruments could be used to green industries, what stimulus programs could induce higher levels of innovation needed for a green economy, what international trade policies could spur the development of a green economy, etc. Members and colleagues will have an excellent opportunity to discuss various issues related to sustainable development, green growth and green economy at this Congress.
